#### Report on Awareness program on

#### "Save soil" on 1st april 2022

NSS-RRIT and IQAC organized Awareness program on "Save soil" on 1<sup>st</sup> April 2022. The function was inaugurated by chief guest Udayakumar kollimath, Dean , Sri Sri Agribusiness academy, Bengaluru and Dr. Mahendra K V, Principal- RRIT Bengaluru. The program was started at 11.30am in main seminar hall. IQAC Coordinator Prof.Parimala G , the NSS coordinator Prof . Gunasheela P, Prof. Shwetha K R and Prof. Girish G organized the event. Principal spoke on the importance of save soil. The chief guest highlighted the following points in this talk.

- Micro- or trace nutrients are required in tiny amounts compared to primary or secondary nutrients. Micronutrients are boron, chlorine, copper, iron, manganese, molybdenum, and zinc.
- A very few plants need five other nutrients: cobalt, nickel, silicon, sodium, and vanadium
- Soil fungi can be classified into three functional groups including: (1) biological controllers, (2) ecosystem regulators, and (3) species participating in organic matter decomposition and compound transformations.
- Ecosystem regulators are responsible for soil structure formation and modification of habitats for other organisms by regulating the dynamics of physiological processes in the soil environment. Biological controllers can regulate diseases, pests, and the growth of other organisms (Bagyaraj and Ashwin, 2017). For example, the mycorrhizal fungi improve plant growth by increasing the uptake of nutrients and protect them against pathogens (Bagyaraj and Ashwin, 2017).
- Fungal populations are strongly influenced by the diversity and composition of the plant community
- , fungi participate in nitrogen fixation, hormone production, biological control against root pathogens and protection against drought They also play an important role in stabilization of soil organic matter and decomposition of residues.
- Common bacterial genera isolated from soil include Bacillus, Arthrobacter, Pseudomonas, Agrobacterium, Alcaligenes, Clostridium, Flavobacterium, Corynebacterium, Micrococcus, Xanthomonas, and Mycobacterium.

- There are five different types of soil microbes: bacteria, actinomycetes, fungi, protozoa and nematodes. Each of these microbe types has a different job to boost soil and plant health.
- It may be doubted whether there are many other animals which have played so important a part in the history of the world, as have these lowly organised creatures.
- Present Scenario: As per Indian Council of Agricultural Research(ICAR) area under problem soils has increased from 220 lakh hectare (2005) to 243 lakh hectare (2010), comprising of alkali soils-37.0 lakh hectare, saline soils including coastal saline areas account for 27.0 lakh hectare and acid soils 179.0 lakh hectare. As such, about 4 lakh hectare area is annually increasing under such soil.
- The alkali soils are largely predominant in the Indo-Gangetic plains encompassing States of Punjab, Haryana, Uttar Pradesh & Bihar and partly in states like, Chhattisgarh, Rajasthan, Andhra Pradesh, Gujarat, Maharashtra, Karnataka, Andhra Pradesh, Madhya Pradesh and Tamil Nadu.
- The saline soils are found mainly in the States of Gujarat, Bihar, Haryana, Rajasthan, Maharashtra, Odisha, Andhra Pradesh, Kerala, Tamil Nadu, Uttar Pradesh and West Bengal. Isolated patches of problem soils are also found in other States.

The program ended by giving vote of thanks by Prof. Ranganathan B A, Asso Prof Department of civil engineering. The students actively participated and made the program fruitful.

NSS & Green club – RRIT celebrated the Earthday 2022 on 28/04/2022 by visiting IIHR Bangalore. Coordinators of the NSS visited the IIHR and gained the knlowledge regarding ongoing projects, research on social entities on our environment. The engineering based research in the field of agriculture for example Constrction of mashroom room in the sstandared temperature naturally, ecofriendly vehicals for trasportation and for harvesting etc.

The program was started with the introduction about the IIHR and its cultivation practices. Students vivisted the whole campus and understood the working procedure. Researchers of IIHR explaied the need and scope of engineeres in the field of agriculture and There is an increased demand for novel genes in germplasm/ genebanks collections for adapting agriculture to biotic and abiotic stresses, including the need of effective screening of germplasm for different characters like, quality traits and biofortification. Research on The changing climate, leads to increase in global warming temperature which dangerously affect the cultivation of crops in arid and semi-arid regions where, fruit based cropping system can be adopted successively. Visit was very much helpful and awakend the studnets about the need of engineering agriculture.

with the awareness program called GERRNE, Speaking on this occasion Mrs. Dakshayani, Reverse Logistics Group.

#### **Event Summary:-**

Mrs.Dakshayini briefed the audiences on the Environmental Hazards of E-waste, she said that the electronic devices, dead cells and batteries thrown away with other garbage contain toxins and hazardous substances which is causing threat for healthy life not only to the human beings but also to the mother earth. The reason for increase in e-waste is that the technology is growing fast and in an attempt to get better devices, casually we get rid of old electronics, the best examples being that of smart phones. Thus, everything that falls into E waste category includes computers, laptops, tablets, smart phones and so on. There are proper methods to dispose of electronic items, they should be handled differently, and suggested to collect and send it to recycling and refurbishing units. The students were asked to launch a campaign in creating awareness and collecting E-waste among their parents, near and dears. Thus collected e-waste will be sent for recycling units to safeguard the Environment.

91 Students (61 from ECE & 30 from EEE) and 15 faculty from the Department of ECE and EEE participated in this awareness program.

## STUDENT INDUCTION PROGRAM

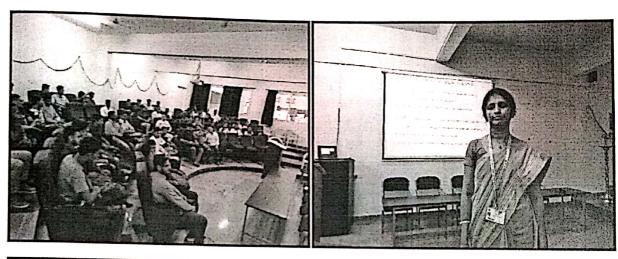

## REPORT OF UNIVERSAL HUMAN VALUE SESSIONS HELD ON3<sup>RD</sup> and 24<sup>TH</sup> AUGUST 2019

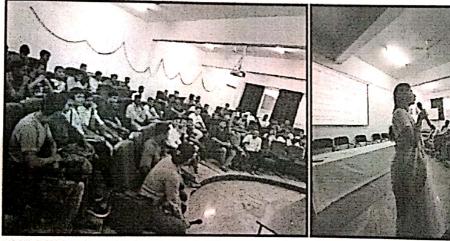

Engineering colleges were established to train graduates in their respective branch/ departmentof study, have a holistic outlook towards life, and have a desire to work fornational needs and beyond. The graduating student must have excellent knowledge and skills in the area of hisstudy. However, he must also have broad understanding of society and relationships. Character needs to be nurtured as an essential quality by which he would understand andfulfill his responsibility as an engineer, a citizen and a human being. Besides the above, several meta-skills and underlying values are needed. There is a mad rush for engineering today, without the student determining for himselfhis interests and his goals. This is a major factor in the current state of demotivation that exists among UG students towards studies. The success of gaining admission into a desired institution but failure in getting the desired branch, with peer pressure generating its own problems, leads to a peer environment that is demotivating and corrosive. For some, the start of hostel life without closeparental supervision at the same time, further worsens it with also a poor daily routine. In order to overcome all these difficulties Universal Human Values must be realized to the students. In this regard, Universal human value sessions are held on 3<sup>rd</sup> and 24<sup>th</sup> August 2019. On both the days sessions were held from 9.30 am to 1 pm in the Seminar hall Main Block.

Universal Human value session by Dr Sunitha H D, HOD & Professor ECE Department on 24th August 2019

On both the days sessions were chaired by Dr Ramachandramurthy, HOD& Professor, Basic Sciences. The resource person on 3<sup>rd</sup> full day and half day on 24th August was Dr Anita R Shettar. She Covered Universal Human Values (UHV) program is for enabling the education of 'Causality', 'Process' & 'Purpose' of Humanness. The topics covered in the session are the followings. Effect of expressing gratitude to people is made to realized. Cooperation is proposed rather than Competition with story of rabbit and tortoise. Excellence is proposed rather than competition. The importance of self-confidence demonstrated quoting examples. The definition of prosperity is proposed. Handling pressure is major issue in many students of this generation of students and consequences were discussed. Trust meaning is discussed. By right evaluation mutual respect is possible. Consequences of anger was discussed. The resource person for the 24<sup>th</sup> August 2019 for half day was Dr Sunitha. In her session topics covered are Interaction and ragging differences, self and body and handling peer pressure.

Subject: Information regarding a movement "Drug Free India" - By 'The Art of Living'

Sir/Madam,

We are well aware that repeated drug or alcohol use interferes with students' physical and mental health, hampering their overall development and a desired future. It is a matter of great concern that many of the drug addicts across India are educated and literate. As an educational institute it is our major responsibility to provide an environment which not only educates the students on the ill effects of drug abuse but also offers prevention measures before getting caught in this vicious circle.

I am pleased to learn that The Art of Living organisation has started a movement called "Drug Free India" across the country under the guidance of the world renowned humanitarian leader Gurudev Sri Sri Ravi Shankar ji.

We thank Hon'ble Human Resource Development Minister Shri. Prakash Javadekar ji 'for sharing an inspiring message urging all the educational institutes across the country to join the Drug Free India Campaign. (Video Message Link: https://tiny.cc/DFLHRD)

Drug Free India is an integrated 360° movement bringing all the key influencers across multiple domains including Government bodies, NGOs, celebrities, social activists on an exclusive platform to help take this movement to the grass root level.

The launch of 'Drug Free India' will be on February 19, 11.00 am in the State of Haryana, which will be webcasted LIVE across India in presence of Gurudev Sri Sri Ravishankar Ji along with several Celebrities, Government Officials and Dignitaries.

AICTE would like to encourage Heads of Institutions/College Management/Students to participate in the launch event via Webcast in their maximum capacity. In this endeavour, every college may form a team of dedicated volunteers called S.W.A.T (Social Wellness & Awareness Teams) who will be closely mentored by the Art of Living faculties to drive the vision of Drug Free India and work for holistic development of students. In the past, Art of Living programs have helped many youths to overcome drug abuse.

A detailed outline of the events being planned as a part of this campaign and relevant links are attached for your reference and necessary action:
